

ARA TECH's TP series tripods are ideally suited for mounting antennas in an EMI/TEMPEST test environment. Primary composition of these tripods (except for the **TP-6** and the **TP-9**) is wood or fiberglass. All models offer minimum reflection in a test environment.

The new **TP-7** and **TP-7R** tripods are designed for antenna or camera mounting UP TO 1000 lbs. Both are durable and versatile and completely constructed of dielectric material. The **TP-7** is a full sized tripod allowing adjustment of the antenna from 36" to 77" by means of a center-locking shaft. The legs are adjustable to ensure level placement of the attached AUT due to uneven floors. The **TP-7R** is a reduced version of the **TP-7** for use with larger horn antennas. This allows for a stable center of gravity during testing. Both tripods fold compactly for ease of transportation. A variety of mounting adapters for antennas and cameras are available.

	TP-1	TP-2	TP-3	TP-5	TP-6	TP-7	TP-9
Height	21"	13"	12 - 74"	12" - 74"	36" - 78"	36" - 77"	25" - 41"
Weight lbs(kg)	2 (0.9)	1.8 (0.8)	11 (5)	11 (5)	10 (4.5)	9 (4)	22 (10)
Load Capacity lbs(kg)	22 (10)	20 (9)	25 (11)	25 (11)	150 (68)	100 (45)	400 (181.8)
Mounting Stud	1/4-20	1/4-20	1/4 - 20	1/4-20	1/4-20	1/4-20	1/2-13
Pan/Tilt Head	N/A	N/A	Included	N/A	Optional	N/A	Optional

TRIPODS TP-1, TP-2 & TP-3

OPTIONAL PAN/TILT HEAD FOR USE WITH TP-6 TRIPOD (GEARED)

- ✓ Very Strong
- ✓ Quick Setup
- ✓ Portable or Semi-Permanent
- ✓ Wide Leg Spread for Stability

TP-7 ALL DIELECTRIC TRIPOD

TP-9 WITH TP-9 PAN/TILT
